Lapeer District Library - Check It Out

Why does Lapeer need a new library?

Quick Facts

Limited parking—28 spaces is not enough to accommodate program parking and library use parking at the same time.

One meeting room—Having only one meeting room limits the number of openings for library programs and free use by residents. The size of the room limits program attendance.

Not enough shelf space—For every new library book and audiobook ordered in adult and young adult fiction and nonfiction an older book must be withdrawn.

Children's Room and Teen Area are too small—Both areas have limited seating and space for other activities such as story time.

Lack of space for new services—Study rooms, a small business center, a production studio, an outdoor learning space, and a creative maker space all have a spot in the new building.

Not enough public computers and no privacy—Patrons often have to wait to use a computer and people at the 11 public computers are elbow to elbow with no privacy screening.

Very little comfortable seating—It is hard to find a quiet, comfortable spot to read and enjoy the library.

The circulation desk is inefficient—It is hard to help more than one patron at a time and there is heavy foot traffic and congestion there due to its location at the entrance/exit of the building.
